

The Plan A logo lockup consists of the program logo and name, which are locked together in a set relationship. Always use the authorized digital or reproduction artwork provided by the NCJW marketing and communications department. Do not attempt to

redraw or retype the logo or name. And be sure to maintain the minimum clear space around the lockup.

The current Plan A logo lockup includes a service mark <sup>SM</sup>, as shown below.

When the trademark process is complete, a revised version of the lockup with a registered trademark <sup>®</sup> will be provided. The same guidelines will apply when this change is made.

**Minimum Lockup Size for Printed Applications**

For clarity and legibility, the Plan A lockup must be of a certain size.

The minimum printed logo lockup size is 1.75" (measuring from the left edge of the N in NCJW to the right edge of the second s in Access).

**Lockup Alignment**

Never alter the relationship of the logo to the name. The elements should be aligned exactly as shown.

**Minimum Lockup Size for Onscreen Applications**

The minimum onscreen logo lockup size is 175 pixels (measuring from the left edge of the N in NCJW to the right edge of the second s in Access).

**Clear Space for Basic Lockup**

This configuration shows the minimum clear space (1/2x) required, as determined by the height of the logo (x).

The color pair for the Plan A program consists of:

NCJW Blue — Pantone®\* 2955 (Navy) — used as the base color of all program materials, and

Plan A Orange — Pantone 1655 (Orange) — used as an accent to NCJW Blue.

When planning to print materials, be sure to specify Pantone ink colors ahead of time with your printer/vendor. These colors are readily available, but, as with many inks, the printer may need to order them in advance.

NCJW Blue should be used for all one-color applications, except in laser-printed or photocopied materials, which appear in neutral colors, i.e., black and white.

**Primary Color Pair**

Use NCJW Blue for the program name and Plan A Orange (PMS 1655) for the program mark. (See the following page for exceptions.)

**Tints**

Both of these colors can be used as tints (screened percentages of the full color) for background and high-lighted areas as long as muted and pastel effects are avoided. Do not use tints for the program name or logo.

\*The colors shown on these pages and throughout these guidelines are not intended to match the Pantone color standards. Pantone® is a registered trademark of Pantone, Inc.

\*\* PMS colors may be reproduced using the four color process. Please embed the PMS colors when submitting files to your printer. Formula builds often vary — due to paper; presses, and screening differences — so please consult your printer to ensure color accuracy.

As mentioned, the Plan A logo should appear in Plan A Orange and its name in NCJW Blue whenever possible. However, you can display the logo and name in a single color — NCJW Blue, black, or white — on NCJW’s authorized background colors or on images, as shown below.

Always make sure that there is enough contrast with the background, and that the lockup is clear and legible.
